

L1.4 In-class Assignment – Intro to R and RStudio

CPSC 292 – 8/31/2026

Name: _____

Collaboration team: _____

Question 1

Write a short explanation about how to install a package using:

- a. RStudio's GUI package manager.
- b. command line in R.

Question 2

What does the `library()` function do?

Question 3

How do you add a comment (or a line not read by R) into a script? Write out an example.

Question 4

Write out three lines of code using simple mathematical functions (+, -, *, /, ^) or any other basic function in R and include a syntax error in each line. Explain the error that would be produced and then give the correct solution below the explanation.

Question 5

Describe the syntax of a typical R function and its three main pieces.
