

L1.5 In-class Assignment – Data Types of R

CPSC 292 – 9/2/2026

Name: _____ Section: _____

Collaboration team: _____

Question 1

In the book, Davies describes logicals as also numbers. Explain *how* this is true in R.

Question 2

How do you create a string in R? What data type are strings?

Question 3

What is an escape sequence and how are they used in strings?

Question 4

You have the following vector of numbers named `blippi`:

```
blippi <- c(8, 7, 9, 10, 8, 4, 8, 1)
```

Write a line of code that would extract all the numbers that aren't 8. Explain how your code works.

Question 5

Why is it important for R to store information with different data types?
