

Lecture 1.3 – Computer Games

Specific Learning Objectives:

1.2.1 – Understand the way computers execute commands.

Thoughts from “Why are you here?”

Personal Growth

- Stepping outside comfort zone
- Make connections with people!
- know nothing about subject / are afraid of subject / struggled in the past

General professional development

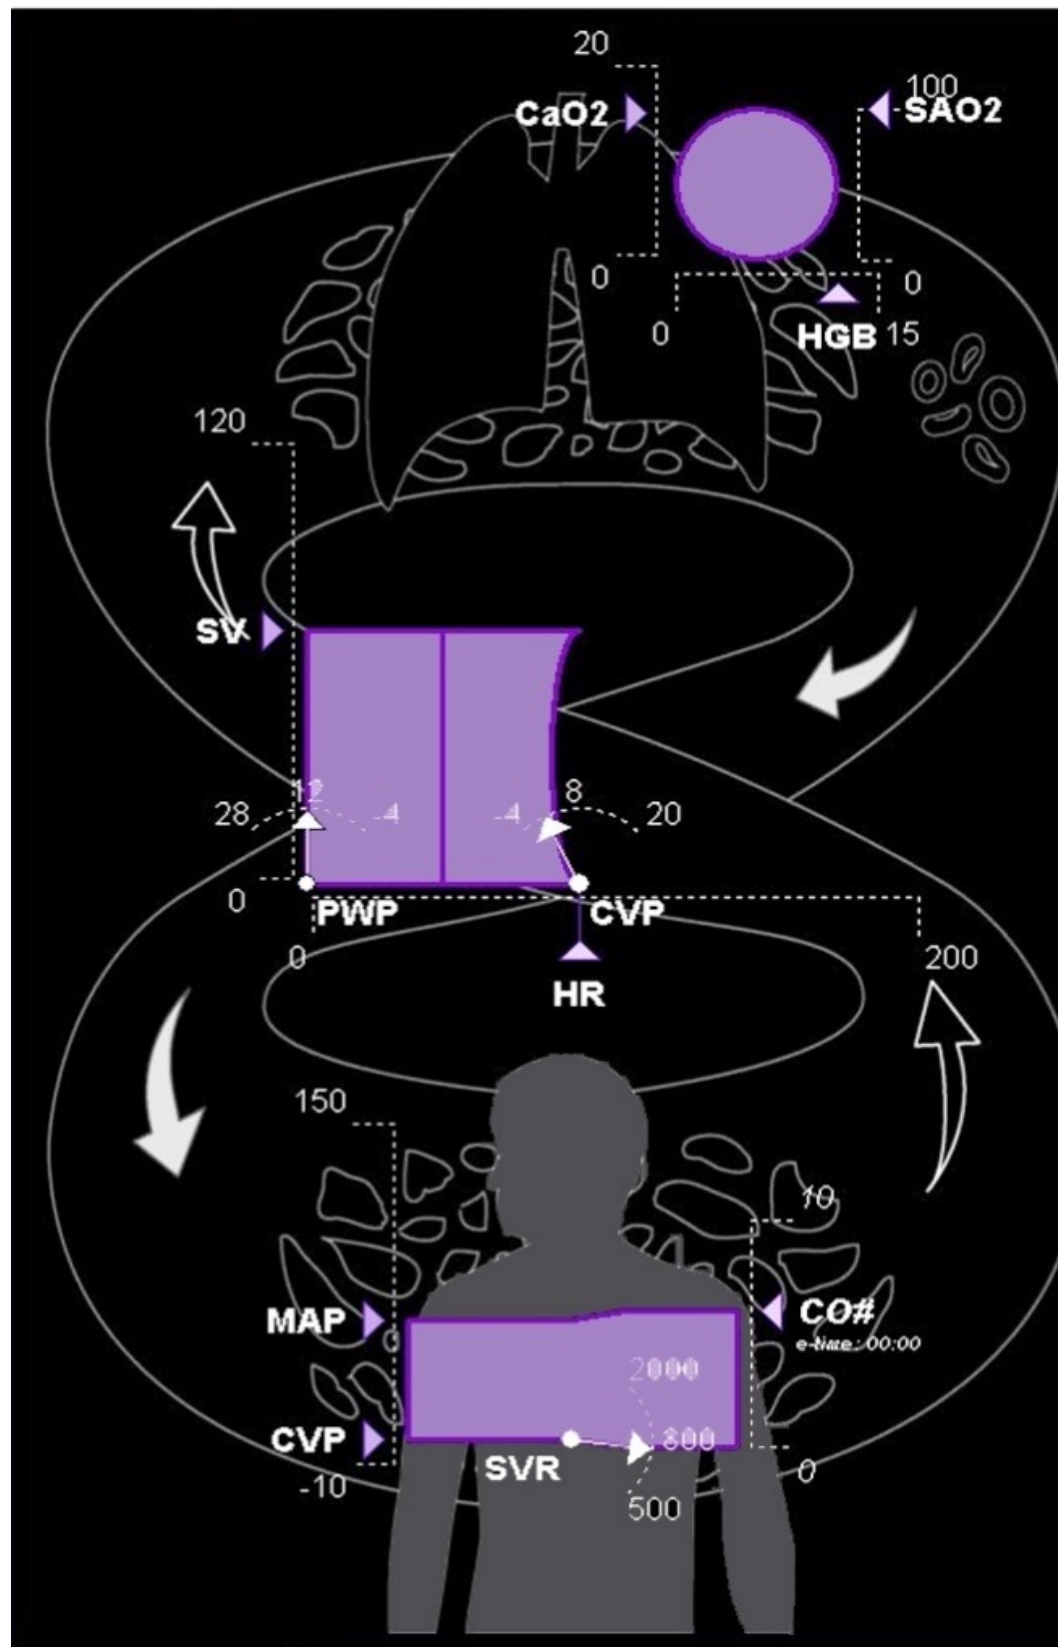

- Because it is required for bio major / neuroscience minor
- Stay organized and help replication crisis
- Improve computational skills

Specific professional development

- Medicine
- Cybersecurity
- Veterinary
- Dentistry
- Anesthesiology

Building Object Displays: Example

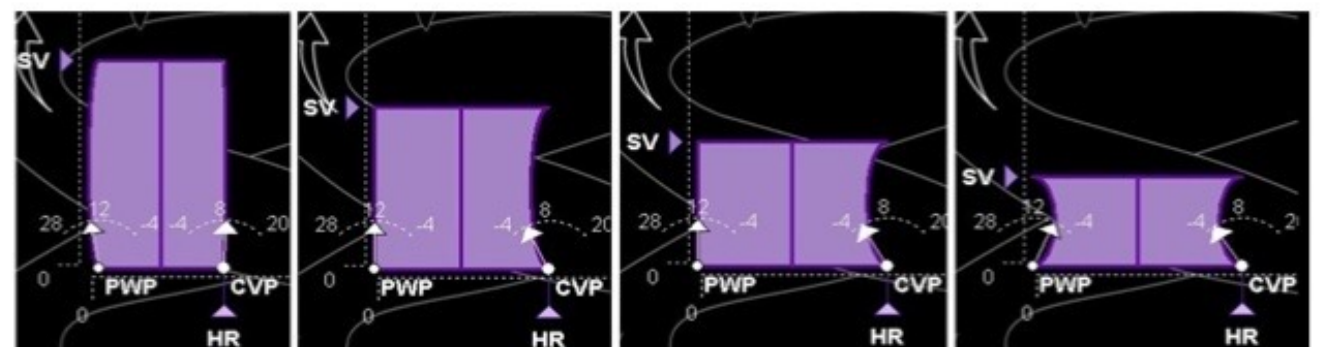

- Example: George Blike's anesthesia instrument readout.

- **Center** represents heart, size and shape of glyph represents four measurements:
 - ▶ *height*: volume pumped by single heart beat
 - ▶ *width*: heart rate
 - ▶ *size*: emergent property showing heart throughput.
 - ▶ *bowing*: pulmonary wedge pressure and central venous pressure, representing right and left pressures of the heart.

**Reduced errors by
66%!**

A hemorrhage in progress

Today's Activity: Computer Games!

- Work with a partner to complete the Computer Games worksheet.**
- Be sure to swap your completed “program” with another pair (who are naïve to the final goal). Integrate this feedback into your program!**
- We'll reconvene as a group towards the end of the period.**

Action Items

- 1. No out-of-class assignment for today.**
- 2. Complete video for Monday's class!**
