

Lecture 1.9 – Factors, Special Values, and Class Coercion

Specific Learning Objectives:

1.1.9 – Understand the data classes of R.

1.1.13 – List the special values of R.

1.1.14 – Create ordered and unordered factors.

1.1.15 – Learn to coerce data from one class to another.

Info on Exam 1

Exam 1 will be on **Friday September 18.**

- It will be in class, so you will have 50 minutes to complete it.
- There will be 10 questions.
- It will cover all CLOs in Unit 1 (check schedule and CLO.pdf for info).
- Bring a pen or pencil. Nothing else will be allowed on the exam.
- All questions will be short answer (similar to in-class worksheets).
- Each question will be scored complete or not (no partial credit per question).
- You will receive feedback and get another in-class opportunity to complete it (Mon Sept 28th).

Check Your Understanding

Create a data frame that contains:

- a column of class character describing something in your current surroundings**
- a column of class factor describing the color of those items**

Check Your Understanding

What would you do in the following scenarios?

- a) You have a data set in a data frame. It is very large, and you want to know whether or not it has missing data values. You'd also like to remove those values so that you only have a set of complete observations.

- b) You have a data frame in which you use your own function with vectorized calculations. When you look at the output, it is `NULL`. What has happened? What should you do?

Check Your Understanding

Which command can accomplish the following coercions:

- a) a logical vector into a numeric vector**
- b) a numeric vector into a character vector**
- c) two vectors into a data frame**
- d) a list into a vector**

Check Your Understanding

1. Past Assignment questions
2. Worksheet!

Action Items

- 1. Complete Assignments 1.11 and 1.12.**
- 2. Prepare for your first Exam!**
